contained Aalto Control luminaires, both ESCAP luminaires and luminaires with batteries. The monitoring unit, with an easy-to-use 7" touch screen and a clear user interface, is mounted permanently on the wall. Aalto Control WMU has an indoor range of 40 meters to the nearest luminaire, the same as from luminaire to other luminaires.

AALTO CONTROL WMU FEATURES

Works independently, without a separate PC or Coordinator

Possibility to add one external Coordinator via Ethernet

Functions on AC power, does not interfere with the electrical supply to the luminaires

History data files of the luminaires can be stored on a USB stick

Prohibition times can be defined for luminaire and duration time tests

Definable and selectable levels of user access

Saving of luminaire and location information and the test history in a database

The relay output with indication of fault condition enables the transmission of fault information into other systems
