

# UPPDATERING AV IP-KLASS FÖR TEKNOWARES PRODUKTER.

Nödljusarmaturernas täthet och hållbarhet uttrycks genom den internationella IP-klassningen, enligt definitionen i standarden IEC 60529. I och med de förfinade testmetoderna i certifieringsprocessen kommer IP-klassningen för vissa av Teknowares nödbelysningsprodukter att ändras från 44 till 43. Det har inte skett några förändringar i produkternas struktur.

De produkter som påverkas av ändringen anges i tabellen.
