

TEKNOWARE POLAND

ABOUT US

Teknoware Poland Sp. z o.o. is located in Siechnice, just fifteen kilometres from Wrocław city centre, chosen because of its excellent location and transport connections to Central European markets.

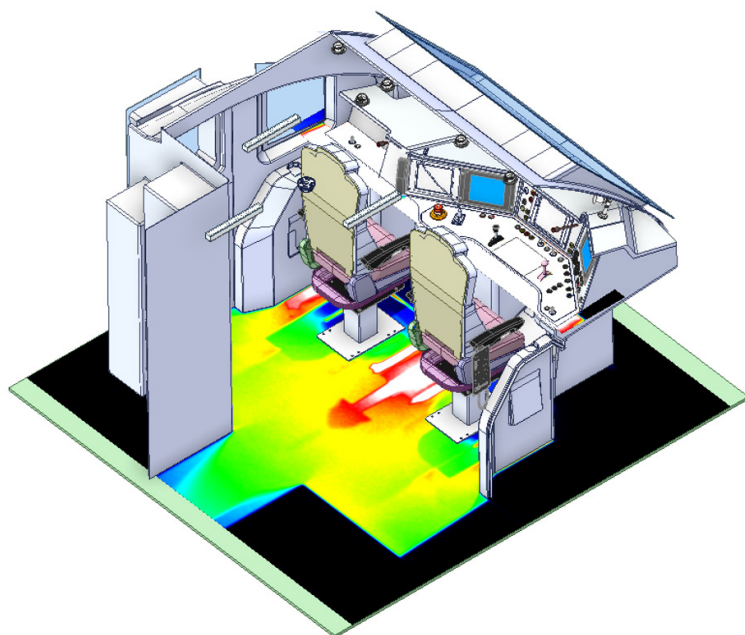

In Poland, we manufacture vehicle lighting, ceilings, and other interiors for trams and trains. The factory, established in 2016, has been expanded with investments in composite panel production and an automated wet painting line added in 2024.

Our products meet the requirements of the relevant railway and bus standards. We are certified in the field of quality management ISO 9001 and environmental management ISO 14001.

IN-HOUSE RESEARCH AND PRODUCT DEVELOPMENT

Our designers, project managers and engineers will manage your project from the initial concept phase to the delivery of high-quality products complying with all the latest EU directives and standards, ensuring your full satisfaction. Our services include:

- Light simulations
- Mechanical design
- Electronics design
- Project management

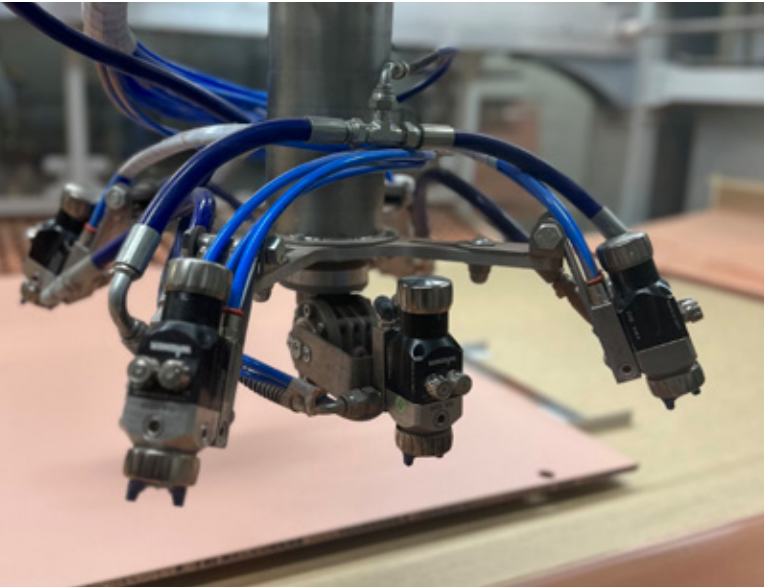

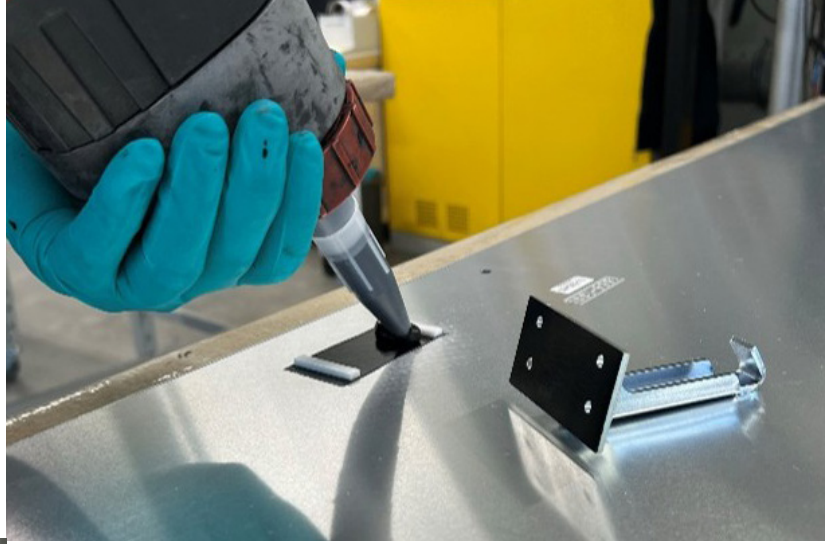

PRODUCTION

Our comprehensive range of machinery enables us to carry out complex processing of:

- Aluminium and polycarbonate profiles
- Sheet metal
- Sandwich-structured panels
- Wire harnesses

The final stages of production involve combining the components into integrated products ready for delivery to our customers.

SPECIAL PROCESSES

WET PAINTING

Our automatic paint line gives us full control over the painting process. The five-gun spray head, 3K mixing system, and 150 m² drying room guarantee a consistent process, effective delivery, and high level of customer satisfaction.

ADHESIVE BONDING

Thanks to modern joining technologies, such as adhesive bonding, we make strong and aesthetic connections of heterogeneous materials. Our processes and products meet the requirements of the DIN 6701/EN 17460 standards.
