

TKT41 CENTRAL BATTERY SYSTEMS

TKT41 series is an easy and inexpensive solution, for when you want to supply a relatively small number of luminaires in a limited area. The series also is suitable for premises, where the central battery system can be decentralized to several independent areas.

In TKT41xx there are, depending on the type, either 8 or 16 circuit outputs, which can be set in two circuit increments to either maintained or non-maintained.

Technical data:

input voltage 230 VAC

output voltage main supply 24 VAC

output voltage battery supply 24 VDC

battery voltage 24 V is formed by two 12 V batteries connected in series

In TKT41xx there are 8 or 16 output circuits
