AALTO WIRELESS/ETHERNET COORDINATOR - QUICK CONNECTION GUIDE

NOTE
This is a quick guide for installing Aalto Wireless/Ethernet Coordinator physically.
Make sure you also have the Aalto Control 4.0 User Manual at hand.

See Aalto Control 4.0 User Manual, Chapter 2.3 Installing Aalto Control Coordinator
for more details about how to configure the Aalto Wireless/Etherner coordinator.

1. Kit contents.

1. Aalto Wireless / Ethernet coordinator
2. Coordinator antenna
3. Power supply
4. Ethernet cable

Figure 1. Aalto Wireless / Ethernet coordinator

Figure 2. Coordinator antenna

2. Installation

1. Check the MAC address of the Coordinator Unit from the bottom of the Coordinator.
2. Connect the Coordinator antenna to the Coordinator.
3. Connect the Ethernet cable between the Coordinator and a LAN connection or your PC.
4. Connect the power supply.

NOTE
The RESET button is for authorized maintenance use only. Do not press it!
